Summary

I have been working in software development for more than 5 years. Currently, I am focused on web application development using latest technologies and tools. I always try to follow the industry standard during coding and try my best to produce high quality codes.

I am highly focused on JavaScript and Php development at the moment. It includes react.js, vue.js, node.js, laravel, codeigniter and mongodb.

I am practising Agile and Docker in my daily work for two years now.

I love to solve problems and eager to learn cutting-edge technologies. I am quick learner, team guy, passionate, hard-worker and responsible. I always try to keep myself updated with latest technologies.

I follow:

1. Daily email updates and stand-ups,
2. Great communication skill and Fluent English,
3. Voice calls and video calls, daily weekly or monthly basis,
4. Quick response during working hours.
