SUMMARY

- Experience with Shopify and JavaScript front-end frameworks (e.g., React, Vue, Liquid, jQuery, Bootstrap, HTML/CSS, etc.)
- Collaborate and align with platform architects, technical leads, and developers to translate business requirements into smart solutions on eCommerce
- Build reusable code and libraries for future use on our eComm sites
- A self-starter, self-motivated individual with a proven track record of working solo on development projects
- Five+ years of business experience in moderate to large-sized corporate environments
- Strong knowledge of collaboration tools like JIRA, Clickup, Asana, Trello
- Working knowledge of Scrum project management and Agile software methodologies
